ERRORS

Exercise:

1) Runtime error

Aptitude Questions:

1) No error
2) lvalue required as increment operand (This is because we are trying to increment the value of constant)
3) lvalue required as increment operand
4) lvalue required as left operand of assignment (We can type cast a value to some other type and store it in another variable, but can't type cast a variable itself)
5) lvalue required as decrement operand
